

QM Web Interface Import Chart Overview

Please Note: The QM Import Chart is only available to users with Security Official Access. You can find this chart under the admin tab in the upper right-hand corner of your screen.

The first section of the import chart is the Measures Import Priority

Measures Import Priority

Indicate Data Priority for each Measure	Claims (CCLF) Imports	EHR Data Custom Imports	EHR Data Single/Spec File Imports	Manual Key Data	Carryover Data from Previous Year
ACO 27 - DM with HbA1c > 9 percent (poor control)	Select a Number **	2	4	1	[Not Available]
ACO 28 - Controlling High BP	1 2 3 4	2	4	1	[Not Available]
ACO 40 - Depression Remission		2	4	1	[Not Available]
ACO 20 - Breast Cancer Screening	Select a Nu	3	2	1	Select a N
ACO 19 - Colorectal Cancer Screening	4	3	2	1	Select a N
ACO 14 - Influenza Immunization	4	3	2	1	[Not Available]
ACO 17 - Tobacco Use: Screening and Cessation Intervention	4	3	2	1	Select a N
ACO 18 - Screening for Depression and Follow-up Plan	4	3	2	1	[Not Available]
ACO 42 - Statin Therapy	4	3	2	1	[Not Available]
ACO 13 - Falls: Screening for Future Fall Risk	4	3	2	1	[Not Available]
Default No Diagnosis? (Lowest Priority) Set answer to N/A if the patient has Monthly CCLF Claims Data with no indication of the diagnosis included in the measure. Applies only to at-risk population measures			Yes		

*Performance answer cannot be imported from claims as requires blood pressure and date
 **Performance answer cannot be imported from claims as requires lab value and date
 ***Performance answer cannot be imported from claims as it requires PHQ9 values and dates

Submit

This section allows users to assign priority levels to the import data for the 10 quality measures listed.

For each measure you will see there are five data types to choose from, **Claims (CCLF) imports, EHR data imports, EHR Data single/spec File Imports, Manual Keyed data** and **Carryover Data from Previous Year**.

Each data import that you would like included in the import process must have a number from the drop down selected.

If a response method has a higher priority level than the one currently being used for that patient’s measure, the old response will be overwritten by the new one. Conversely, attempting to overwrite an old response with a new response that has a lower priority level will not succeed. The exception to this is if the existing answer is **non-performance** and the incoming answer is **performance**, the answer will be overwritten regardless of priority.

There is also an option for ‘Default No Diagnosis’. The measure answer will be set to an ‘N/A’ response if the patient has Monthly CCLF Claims Data with no indication of the diagnosis included in the measure. Applies only to at-risk population measures. If selected ‘Yes’ this option will have the lowest priority on the import chart.

The following measures cannot import performance answers from claims.

ACO 27 - DM with HbA1c > 9 percent (poor control)	Select z **	2	4	1	[Not Available]
ACO 28 - Controlling High BP	Select z *	2	4	1	[Not Available]
ACO 40 - Depression Remission	Select z ***	2	4	1	[Not Available]

***Performance answer cannot be imported from claims as requires blood pressure and date**

****Performance answer cannot be imported from claims as requires lab value and date**

*****Performance answer cannot be imported from claims as it requires PHQ9 values and dates**

Submit

Once you have completed your prioritization options, click **Submit** to confirm your changes.

Below the import priority options users will have to make decisions about GRPO options.

Gpro Decision.

Options	Response
Launch QM 2021 The first available date is January 15, 2021. QM 2021 is locked to your 2021 HASSGN file and cannot be changed until the Q1 2021 QASSGN file is received.	10/21/2020
Date to enable GPRO 2021 saving This will enable saving in GPRO 2021 and simultaneously disable QM 2021 portal. January 04, 2022 is the first available date, however this date is subject to change depending on the release of GPRO random sample.	01/04/2022
Do you want to unlock TIN / NPI assignment for GPRO 2021? Please be careful changing this selection - it will allow you to make changes to the TIN/NPI Assignment for patients included in your GPRO 2021 random sample. Your initial selection will take effect on the date to enable GPRO 2021 saving above. It is defaulted to No, which means we will NOT unlock your TIN/NPI assignment and apply updates that you have made. The initial assignment is as of the date the random sample was populated. If you decide to change to Yes, this means you WILL unlock your TIN/NPI assignment and apply updates that you have made if you change to Yes and then No, you will move forward with the assignment at the time you made the change.	No
Date to finalize GPRO 2021 submission This will disable saving in GPRO 2021 portal. The last available date is March 30, 2022.	03/30/2022

Submit

- Launch QM is the first day you can open QM for the next Performance Year.
- Date to Enable GPRO saving. When you open GRPO for saving QM will be disabled at the same time. This is to ensure users are entering data in the correct portal. First available date is subject to change depending on the release of GPRO random sample.
- Unlock TIN/NPI assignment for GRPO. Be careful when choosing 'YES' for this selection. Choosing 'YES' will allow you to make changes to the TIN/NPI assignment for patients included in your GPRO random sample. This selection is defaulted to 'NO'.
- Date to Finalize GPRO 2021 submission. The date you choose here will decide when you will disable saving in GRPO for the current performance year.

Submit

After selections are completed, click **Submit**.

The last section of the QM Import chart are the Mandatory Defaults.

General Defaults.

General Questions - Apply to All Measures	Response
Default Age and Gender (Highest Priority) Applicable measure will be answered N/A if the Quarterly Patient Attribution File indicates that the patient's age or gender is outside of the measure range.	Mandatory
Default Date of Death (Highest Priority) Mark all patients as Not Qualified (Skip - Yellow Flag) if the Monthly CCLF Claims Data provides a Date of Death. Also applies to patients with completed questionnaires.	Mandatory
Default Date of Hospice? (Highest Priority) Mark all patients as Not Qualified (Skip - Yellow Flag) if the Monthly CCLF Claims Data provides a Date of Hospice. Also applies to patients with completed questionnaires.	Mandatory

These defaults take the Highest Priority in the import process. Patients with a Default Date of Death or Default Date of Hospice will be marked with a Yellow Flag and skipped.
